ABOUT ME

I'm drawn to creative, ambitious work that reaches a lot of people — and I want to spend my career on a mission I believe in, putting well-made technology to work in ways that make everyday life better.

LANGUAGES

- Spanish (Native)
- English (Native)
- French (Learning)
- Swedish (Learning)

AVAILABILITY

I'm starting a full-time MSc at KTH in Stockholm (Aug 2026). Ideally I'd find time to get started with a company I believe in along the way, do my thesis with them, and carry on working together in Stockholm afterwards.

EDUCATION

MSc Technology-based Entrepreneurship
KTH Royal Institute of Technology
2026 – 2028 Stockholm

B.Eng. Industrial Engineering
Pontifical Univ. of Comillas (ICAI)
2019 – 2025 Madrid

Entrepreneurship Bootcamp
Pontifical Univ. of Comillas
2022 – 2024 Madrid

CS50: Introduction to CS
HarvardX
2024 – 2025 Online

CS50 SQL
HarvardX
2024 – 2025 Online

EXPERIENCE

Business Intelligence Intern

Amazon

Sep 2025 – Feb 2026

Madrid, Spain

- Designed and built a system that ingests and monitors operational data from a European network of robotized sites in real time, replacing a manual, specialist-heavy process (hundreds of specialist-hours daily).
- Serverless pipeline (Lambda, Step Functions, EventBridge, Redshift) with infrastructure as code (AWS CDK, co-developed with a senior engineer).
- Project write-up

Business Intelligence Intern – Undergraduate Thesis

Cigna Healthcare

Sep 2024 – Jul 2025

Madrid, Spain

- Built the analytics layer for the individual policyholder portfolio: ETL pipelines, Tableau dashboards, and customer segmentation. Trained ML models (Scikit-learn, XGBoost) for cost prediction and benchmarked them against actuarial pricing.
- Project write-up

Data Intern

Wequity (ESG AI Startup)

Jul – Oct 2023

Brussels, Belgium

- First real exposure to building software. Learned Docker, Kubernetes, and API development. Built a Google Sheets integration that called OpenAI through a custom REST API.

SKILLS

Building with AI Agents

Claude Code
Cursor
Codex
OpenClaw

AI in Products

REST API integration
Embeddings

Core

Python
SQL

Data & ML

Pandas
Scikit-learn
Pyomo

Analytics & Visualization
