ABOUT ME

I like ambitious work that reaches a lot of people. I want to spend my career on something I believe in, building technology that makes everyday life a bit better.

LANGUAGES

- Spanish (Native)
- English (Native)
- French (Learning)
- Swedish (Learning)
- Swedish course at SIFA

WORK RIGHTS & ID

- EU citizen: no permit needed
- Swedish personnummer
- Swedish ID card
- BankID & Swish
- Spanish passport
- Spanish DNI

AVAILABILITY

I'm doing a full-time MSc at KTH in Stockholm until June 2028. I'm free for a summer internship in 2027. Ideally I'd find a company I believe in, work with them during the master's, write my thesis there and stay on in Stockholm after.

EDUCATION

MSc Technology-based Entrepreneurship
KTH Royal Institute of Technology
2026 to 2028 Stockholm

B.Eng. Industrial Engineering
Pontifical Univ. of Comillas (ICAI)
2019 to 2025 Madrid

Entrepreneurship Bootcamp
Pontifical Univ. of Comillas
2022 to 2024 Madrid

CS50: Introduction to CS
HarvardX
2024 to 2025 Online

CS50 SQL
HarvardX
2024 to 2025 Online

EXPERIENCE

Business Intelligence Intern

Amazon

- Sep 2025 to Feb 2026 Madrid, Spain
- Built a system that watches the data from Amazon's robotic sites across Europe in real time. Before, specialists checked it by hand, which took hundreds of hours a day.
 - It runs on AWS (Lambda, Step Functions, EventBridge, Redshift). I set up the infrastructure in code (AWS CDK) together with a senior engineer.
 - Project write-up

Business Intelligence Intern (Undergraduate Thesis)

Cigna Healthcare

- Sep 2024 to Jul 2025 Madrid, Spain
- Built the data pipelines, Tableau dashboards and customer segments for the individual health insurance customers. I also trained models (Scikit-learn, XGBoost) to predict costs and compared them with the actuaries' pricing.
 - Project write-up

Data Intern

Wequity (ESG AI Startup)

- Jul to Oct 2023 Brussels, Belgium
- My first time building software. I learned Docker, Kubernetes and how to build APIs, and I connected Google Sheets to OpenAI through an API I wrote.

SKILLS

Building with AI Agents

- Claude Code
- Cursor
- Codex
- OpenClaw

AI in Products

- REST API integration
- Embeddings

Core

- Python
- SQL

Data & ML

- Pandas
- Scikit-learn
- Pyomo

Analytics & Visualization

- Tableau
- QuickSight

Cloud Data Infra (AWS)

- Redshift
- Lambda
- S3
- Step Functions
- EventBridge

DevOps

- Git
- Docker
- Kubernetes

BUILDING TOWARDS

Business

- Business Models
- Strategy
- Finance
- Firm Growth

Venture

- Fundraising
- Negotiation
- Cap Tables
- Scaling

Product

- Discovery
- Roadmapping
- Go-to-Market
- Prioritization

Engineering

- Terraform
- CI/CD
- Docker
- Kubernetes
